### Advertising Rules

(for information only, please check the Austrian regulator's website for latest and complete information: [www.rtr.at](http://www.rtr.at))

1. The content provider has to make sure that all advertising contains the following information in an easily readable way:
  - a) the number to call the service;
  - b) information regarding the price for using the service
  - c) a short description of the service
  - d) eventual limitations of the service
2. The price information has (for pay-per-minute numbers) to be in "Euro per Minute" (€/min.). Is possible, the expected price for the complete consumption of the service have to be mentioned, too. (i.e. for viewing a movie with a voice dialer you can tell the total price for the connection for the movie's length.)
3. The pricing information has (for pay-per-call number) to be in "Euro per Call" (€/Anruf).
4. Written information has to be easily readable and should be near the number advertised. Audible information has to be immediately after announcing the number and must be clearly understandable.

### Announcements

The carrier makes sure that an announcement stating the price per minute or call is being played at the beginning of the connection.

## Time limits

The duration of pay-per-minute connections is limited to 30 minutes (60 minutes, if tariff lower than 2,20 €)

## Opt-In for Dialers

Carrier are forced by law to make sure that a 0939 number, the only number legally usable for dialers, is only reachable from customers which actively have asked for activating this numbering range.
